# reserve 'by the glass' list

**all reserve wines are kept in a temperature and humidity controlled unit and dispensed with the coravin system**

a thin, non-coring, medical grade needle passes through the cork to access and pour the wine, leaving the cork intact. as the wine is dispensed through the **coravin**, it is replaced with inert argon gas. oxygen never enters the bottle, so no oxidation or deterioration of the wine ever occurs. when the needle is removed, the cork reseals and continues to protect the wine indefinitely, assuring the same level of quality again and again.

the **coravin system** will allow our guests to sample and enjoy **highly allocated, rare and aged wines** that were previously too cost prohibitive to open and serve by the glass

**the fruity style:** loads of crisp citrus fruit, tropical fruit, some stone fruit, gooseberry,

**the grassy style:** aromas of freshly cut grass, herbs, and minerals that compliment the fruit beautifully. **the oaked style:** primarily in california, it is aged in oak, producing a creamier style with a touch of smoke and vanilla (often labeled fume blanc), oak lowers the crispness and zest but creates a wine more similar to chardonnay in style.

**the mineral style:** sancerre wines have an added mineral quality with the fruit due to the limestone, flint, and various clay terroir giving them a distinctive chalky or flinty note.

## • chenin blanc •

*chenin may be crafted to any level of sweetness, ranging from bone dry, sparkling and crisp through to sweet dessert wines. chenin blanc from the 'anjou aoc' in loire tend to be more dry in style with nice minerality and underlying flavors of quince and apples. in nearby 'vouvray aoc' they aim for an off dry style, developing more honey and floral characteristics with age. the best vintages can be left on the vines to develop 'noble rot', producing an intense, thick dessert wine which improves considerably with age. showing yet more versatility, the highly regarded chenins from the stellenbosch, south africa lean more towards the tropical fruit flavors of pineapple, melon, guava and banana*

# 'pink' wine

whether it's rose (france), rosado (spain), rosato (italy) or "blush" – these all refer to 'pink' wines. this pink shade can range from a soft, subtle hue to a vibrant, hot pink, depending on the grapes used and how long the grape skins were in contact with the juice. roses can be made in a sweet, off-dry, or bone dry style, with most european ones being mostly dry. a fantastic food wine with flavors of cherry, strawberry, cranberry, raspberry with some citrus and watermelon presenting on a regular basis

## • petite sirah • (a.k.a. durif)

***durif** is the offspring of a cross-pollination between **peloursin** and **syrah***

**there is nothing “petite” about a petite sirah. this is a grape that is all about power, not finesse. it’s more like liquid meat than any other red wine out there, with an inky dark color, gripping tannins and savory aromas of blackberries and spice. its perfect match is grilled mushrooms or any grilled meat, especially lamb.**
